Subject: Development permit 2232-2244 welcher

Hi,

I just wanted to voice my concern for the project at 2232-2244 welcher in regards to the public input opportunity received in the mail for the building. The project is a 5 story rather than the the usual 4 or 3 story low rise building, and this would look different than other buildings on the block and would tower over the others and may impact the price in other buildings. I believe this should be limited to the same height as the other buildings on the block that have a pitched roof or semi pitched roof over them. While I enjoy the revitalization of the area, it cannot come at a cost of the area's history and impact to the others who already live around the project.

Thanks
